

Robert Graman

Denver, Colorado | 314.605.4676 | robertgraman1246@gmail.com | <https://www.linkedin.com/in/robert-g-802399106/>

Creative and proactive Computer Science engineer with 5 years of experience in object-oriented programming, digital signal processing productization, and open-source software installation to boost the productivity of all Engineers. Eager to use my security clearance for new opportunities

EDUCATION

University of Missouri - Columbia

Major: Computer Science **Minor:** Information Technology

GPA: 3.73

Honors: Dean's High Honor Roll, all semesters. Excellence Award Scholarship

SKILLS

- Active TS SCI Security Clearance with an active CI poly
- Agile methodologies (Scrum, Sprints, etc.)
- DevOps & Containerization: Docker, Helm, Kubernetes
- CI/CD Pipelines: Jenkins
- Languages: Java, C, C++, Python, Spring, Spring Boot
- Tools: Unity, Git, Linux, Atlassian Suite (JIRA, Confluence, Bitbucket, Bamboo, Nexus)
- Excels in collaboration and communication

SOFTWARE ENGINEER EXPERIENCE

Software Engineer P3, Raytheon, Aurora, CO

April 2024 – Present

- Moved across to struggling programs to guarantee delivery of products in tight timeline
- Used new knowledge of DevOps and CI/CD Pipelines to complete high priority tasks
- Led Features through design stage all the way to implementation
- Led team in final integration steps of High priority task that was causing operational outages
- Traveled alone to Australia to support customer training activities
- Interfaced with other programs to gain potential revenue while on travel

Software Engineer P2, Raytheon, Aurora, CO

June 2022 – April 2024

- Designed and delivered UI automation process that reduced the time on task by 75% for operators
- Finalized development of multi-year capability that allowed integration of a new signal into operations
- Constructed software release documents and led installations that allowed for multiple successful deliveries
- Functioned as key integration lead while upgrading legacy system to accommodate RedHat 9 OS upgrade
 - This upgrade contained numerous baselines and thousands of classes across many programming languages
- Modernized and revised full system level regression tests that had not been updated in years
- Integrated two different programs into one to allow for operators to smoothly use both systems simultaneously
- Delivered documentation and led training for operators for multiple new capabilities during all hours of the night

Software Engineer P1, Raytheon, Aurora, CO

June 2022 – Oct 2023

- Led group of fellow new hires to quickly learn code base and document unknown issues
- Chosen to lead a tiger team to fix the operational problems that were affecting mission-critical systems
- installed new code base in Linux along with making code changes with git and bitbucket

Software Engineer – Intern, Raytheon, Richardson-Cityline, TX

May 2019 – June 2022

LEADERSHIP EXPERIENCE

Deputy Product Owner / Scrum Master, Raytheon, Aurora, CO

June 2023 – Present

- Analyzed all incoming JIRA tickets and assigned to personnel based on specific customer priorities and funding
- Lead daily standups along with weekly meetings to allow for full team productivity
- Interfaced with customers and external partners to assess problems, gather requirements, and develop efficient solutions
- Recognized from managers as a model for other to follow
